

autology

School budgets
under pressure?

Autology is the
answer

Autology allows your school to combine world leading learning technology with the ability to save money, manage your digital resources and improve student performance. Over 100,000 UK students already use Autology.

www.autology.org

Why should Schools & Colleges use Autology?

Autology provides more than £3000 worth of text books and revision guides, Encyclopaedia and multimedia resources for every student. This is a whole school resource solution that will save money.

Time wasting associated with Google searching and establishing integrity of websites is eliminated with Autology. It is pre-loaded with age differentiated quality textbooks from Heinemann, revision guides from Letts and Lonsdale, Encyclopaedia Britannica and teacher selected websites, prime video feeds and school's own content.

Quality content contained in Word documents, Powerpoint presentations and other digital sources which have been accumulated over many years by schools can be uploaded easily and made instantly searchable. No time consuming manual tagging is required.

Schools can be assured that students have a learning tool available, both in school and for home use that always gives them the resources they need to complete any work assignment.

Autology is a unique learning support system which:

Provides a dynamic and intuitive learning environment;

Makes hundreds of current textbooks and revision guides available online for the first time;

Eliminates time wasted searching by the use of 'Active Folders';

Automatically delivers not only text but audio and video to suit different learning styles;

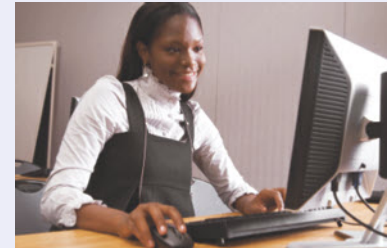

Changes the way students interact with on-line information;

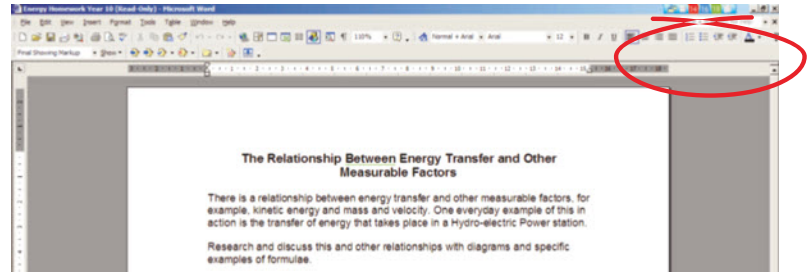

Improves student performance and achievement;

Provides students a focused research tool designed specifically to cover the UK 11-18 years curriculum.

Autology's unique Push Technology in action

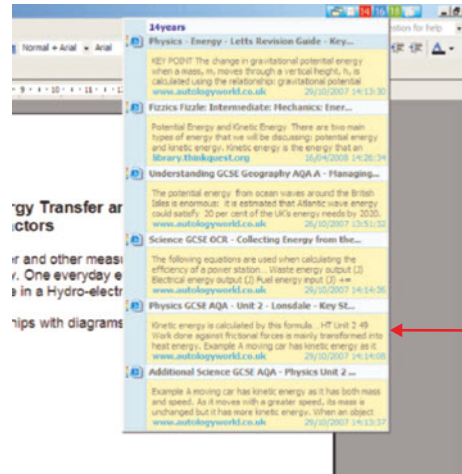

Teachers concerned about plagiarism are immediately able to resubmit the work into Word with the Autology Toolbar open to check if any direct copying has occurred.

Just click on the age range icon and suitable reference materials from text books and selected web sites will be available in the drop down menu here.

Autology places the responsibility on students to analyse and evaluate a variety of reliable and high quality resources which promotes independent learning.

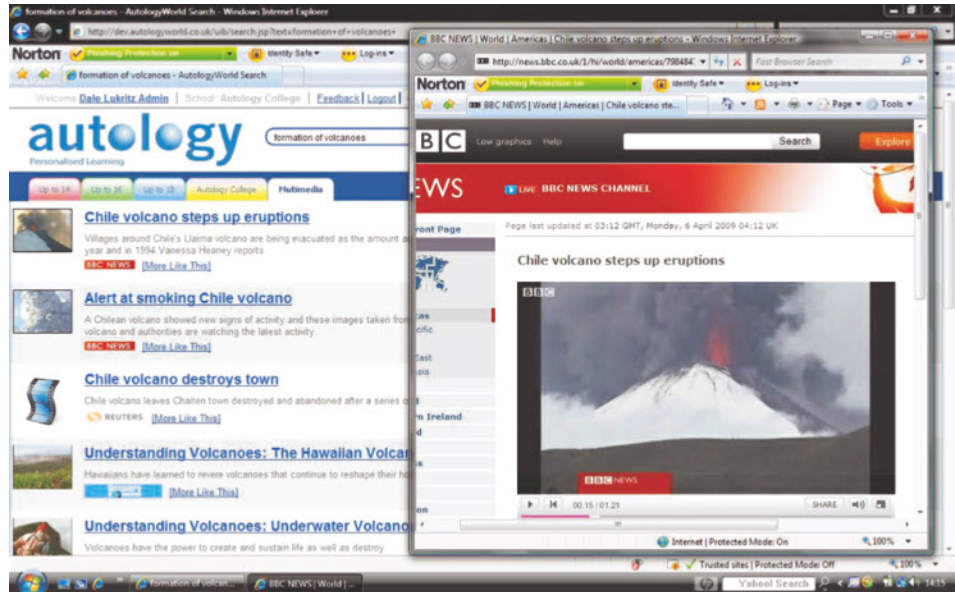

Autology's 'Push Technology' is unique, enabling students to develop concepts in assignments and have the relevant references pushed to them as they work in a Word document, for example.

A selection of the video feeds indexed within Autology which are searchable for schools, utilising Autology's unique technology.
